

AMBITIOUS? BRIGHT? RIGHT.

GAM is one of the world's leading independent, pure-play asset managers. We provide differentiated active investment solutions and products for institutions, financial intermediaries and private investors. Our core investment business is complemented by private labelling services, which include fund administration and other support services to third-party institutions. Together we share a common set of values rooted in teamwork, integrity, entrepreneurial flair and professional excellence.

Our employees are our most valuable asset. Being able to offer an attractive work environment where talented minds from various backgrounds are keen to work is key to the long-term success of our company. We firmly believe in the importance of maintaining the open culture of a small company, aiming to avoid bureaucracy and encouraging a flexible, accessible and hands-on working style across the Group. In turn, our people reward us with their loyalty.

IT Developer

Function:

Operations

Department:

IT Systems & Development

Purpose

This is a development role, working on major applications with various technologies; however, the role will involve work on all stages of the software life cycle.

Main Duties & Responsibilities

- Become an active member of a highly skilled Scrum team and be prepared to share experiences and learn as appropriate.
- Develop the strategic platform for data flow between GAM systems, external partners and internal systems.
- Develop systems to support GAM's Front Office business.
- Opportunity to work with AWS technology.
- Working with the users where necessary to perform analysis and specification of new systems and any required changes to existing systems.
- High level and detailed design of required solutions to meet the business needs.
- Provide required levels of documentation.
- Work within the GAM approved lifecycle.

Qualification and Requirements

- Significant experience required of developing front to back solutions with some of the following technologies: C#, .NET, Web API, ASP.net Core, Entity Framework, SQL Server, Javascript, HTML, Angular/Typescript or React.
- Experience required building in cloud native AWS technologies such as Serverless, Lambda and Step Functions. Experience in designing and delivering systems using microservice approach.
- Experience developing with Python and C++ an advantage.
- Understanding of an enterprise environment (change control, version control, release management, separate environments).
- A proven track record in delivering on time.
- A solid understanding of Microsoft patterns and practices and VSTS/Team Foundation Server (TFS) practical knowledge.
- Relevant exposure to Front Office particularly with buy-side systems such as ThinkFolio, Bloomberg an advantage.
- Product knowledge of the following: Fixed Income, Equities and FX an advantage.
- Relevant mathematical, engineering or scientific degree.

Personal Attributes

- Must be a team player, have strong written and verbal communication skills.
- Comfortable working with business users.
- Manage their workload within the Scrum framework.
- Take ownership of problems that are passed to them.
- Personable, open minded.

- Delivery focused.

Benefits

GAM offers a comprehensive range of benefits and performance-based compensation, along with a variety of lifestyle and family benefits to promote well-being in and out of the workplace. These benefits vary according to local market conditions. Please contact the local Human Resources team for further details.
